

## THE AUTOMOBILE WORLD

Motor trucks of special design are now being used in San Francisco to deliver ice.

According to Emerson Brooks, of the Automobile Club of America, the term "top" originated in South Africa, and was used to describe the tops on bullock carts.

Under the proposed Delaware motor law, a motorist can make a justice of the peace a veritable pawnshop. He can leave his fur coat, fixtures, pocketbook, car or anything in default of ready money.

According to a ruling by a Philadelphia judge, motorists in driving through that city, should either come to a full stop at street crossings or keep the machine under absolute control to avoid striking pedestrians.

A company has recently been organized in Germany to study the possibilities of Motorluftschiffahrtstudienaktien-gesellschaft, a melodious word meaning "Stock Company for the study of Aerial Navigation by Motors."

Two interesting bills are before the Michigan Legislature. One makes it a felony to use an automobile without the consent of the owner. The second bill provides for employment of prisoners of the hobo type in road improvement work.

Under a decision of the United States Circuit Court of Appeals, motorists, on approaching a railroad crossing, are bound not only to "stop, look and listen," but, if necessary, to leave the machine and walk to the track like a street car conductor.

Feeling a final decision in the test case instituted by motorists of Cincinnati to determine the right of cities to impose an automobile tax in addition to that imposed by the State, the trustees of the Ohio Automobile Association have decided to make no effort to collect any special tax.

Told that a dog had been struck by an automobile and its leg broken, in front of her residence in New York, Mrs. John Jacob Astor recently ordered the suffering animal brought into her home. She bandaged its leg and the next day called in a veterinary surgeon. Then she advertised for the dog's owner.

A recent decision of the United States courts has held that an auto of foreign manufacture used and repaired abroad is exempt from the tax. The country must pay duty on its return, even though it has been assessed the Dingley tariff rate at the time of its original importation.

The committee in charge of the carnival to be held in New York during the week of April 26, under the auspices of the New York Automobile Trade Association, has decided to offer \$2,000 in prizes for the cars in parade on the last day of the carnival.

The Good Roads Club of Georgia is discussing a good highway, stretching in a general direct line 700 miles from Atlanta to Washington, D. C., kept up by the several counties in the various States through which the road would pass.

Ranchers and grape-growers in the Los Angeles Valley, Cal., it is said, require automobile dealers to subject their cars to thorough tests on hills and roads, and demand that the cars be absolutely proof against the various tests the farmers and wine-makers in Fresno and the surrounding country own automobiles.

An excellent method of keeping the glass of a wind shield clear on a rainy day, is to rub the outside of the glass with a rag dipped in kerosene or kerosene oil. The glass will at first appear dull, but as soon as it is rubbed upon it will become as clear as though it had been dried.

In a non-stop run of 30,000 miles the rear wheels of a car have to revolve 3,500,000 times, and there will be 44,000,000 explosions if four cylinders are used.

Under French motoring laws the driver of a car, in case of an accident, need remain on the scene for as long as he wishes to establish his identity.

The Automobile Club of Washington has decided to put up a vigorous fight against the imposition of a wheel tax by Congress in the District of Columbia on the ground that it is class legislation. Members of the organization have decided not to pay the tax until compelled to do so by the Federal courts.

The annual endurance run of the Norristown, Pa. Automobile Club, which is scheduled to take place May 15 and 16, will be a sort of novelty, as some women drivers have accepted the invitation of the club to compete with the men drivers. Twelve women have already signified their intention of entering in the contest, which will be held over a course leading to Hagerstown and return.

Hats for motoring this season are decidedly simple on the whole, although there are, of course, some very gorgeous creations being shown. One Paris motor bonnet is of cherry colored suede with draped velveteen and a small silk and sunflower rosette of the same shade. Another is the new modish, turban-like affair of brown, edged with small pale pink roses.

A number of garages in Paris have developed a system of saving by installing the contents of fuel tanks on transient cars that are run in for the night. By means of a pump the gasolene and cylinders of the same make are pumped to the garage owner's tanks, a sufficient quantity being left in the tanks to enable the car to return to its journey a few miles before a day of starvation. The practice has grown to such proportion that looks are being fitted to filler caps.

Designs are being submitted to M. Robert Guggenheim for the silver trophy which he has offered to donate for the trans-continental race in this country. The trophy is to be a silver cup, one car for each of the same make entered by the same owner, \$700 for three cars of the same make entered by the same owner and \$100 additional for each additional car of the same make entered by the same owner.

The winner will receive the trophy and \$2,000 in gold; the second car, \$1,500; third, \$1,000; fourth, \$500, and fifth, \$300.

On July 1 next a new automobile law which North Carolina has placed on its books will become effective. This new law has a strange feature in that it exempts from its operation the little seacoast county of New Hanover, in which Wilmington, the chief city, is located.

The law imposes a registration tax of \$1. Speed is limited to twenty-five miles an hour on rural roads and twelve miles in incorporated towns, except in business portions where eight miles is the limit.

One of the most novel contests yet devised has just been held by Auto in Paris. It was known as an "ear" contest. The competitors assembled in a large garage. In an adjoining room and concealed from their sight were fifty cars of all different but well known makes. The motors were started in succession and the competitors took notice of them by the names of the cars they thought they recognized. Gold and silver medals were awarded to those whose ears proved the most accurate.

The operations employed for obtaining hardness in high speed steels are very remarkable; they are quite opposed to the practice of obtaining with older carbon steels. The best results are produced by practically burning or fusing the nose, say, of a drill or lathe tool and grinding the burnt end off.

In order to furnish the required heat for such operations, electrical plant or even oxyacetylene flames are used, but the more common and convenient plan is to use a bath of molten metal, such as molten iron, or a molten salt electrolytic.

the secret of long life is moderation.

i've lived a long time and

i take two or three drinks of whiskey

each day. my experience is that whiskey when taken that way acts as a mild tonic and prevents illness.

good whiskey costs me no more than the other kind, because i specify the brand.

for years i've been saying, "a little mark rogers, please." this whiskey is a splendid pure rye, thoroughly aged and mellow. it's very fine, and any one

would have a hard time switching me to another brand. i always find

mark rogers at the best places.
